International Shipping
A Brief Overview

UTO Bituminous Products, was formed due to the steady growth of its founder company, Siyabonga Trading. This growth came over a period wherein the Company developed its resources within the bitumen Industry.

UTO Bituminous Products has steadily grown since its inception in 2008, and has successfully implemented projects in different countries in Africa. With this growth, the emphasis and responsibility of the company became more focused on the upliftment and development of previously disadvantaged South Africans.

This responsibility was the inspiration to realign the company in accordance with the latest requirements, of the Act on Black Empowerment. Our new found partnership and subsequent name change to UTO and subsequent management buy out, was the first step towards realising the goal of establishing a fully compliant BBBEE Company.

The range of logistics services offered is continually adapted to meet the changing requirements of the market place and its customers ensuring that full advantage is taken of the latest technological developments.
Our Clients & Partners
